# USE MORE, WASTE LESS

to see food waste being reduced in the world, social enterprise TreeDots employs a business model that links companies with unsold food inventory to other businesses. In doing so, they efficiently redistribute all unwanted fruits and vegetables that are otherwise a burden to food producers, importers, and distributors — effectively bringing us closer to a circular economy. #RecycleMoreWasteLess

TreeDots is a 2018 DBS Foundation Social Enterprise Grant recipient. The Grant was awarded to increase business efficiencies and reduce error by supporting the development of an online food distribution platform.
